XGSun®

RFID Tag Manufacturer & Service Provider

Contents

![XGSun]

Who We Are

XGSun Technology, founded in 2009, is one of the earliest enterprises in China to enter the RFID industry, providing professional RFID innovation as a tag manufacturer and service provider for global clients.

The company operates 17 bonding and lamination production lines, equipped with advanced visual inspection systems and Finland's Voyantic multi-channel testing system, enabling an annual capacity of 1.5 billion RFID tags. XGSun has built a production service system centered on product, technology, and process innovation.

Over the years, the company has developed a professional engineering team of more than 30 specialists dedicated to RFID label innovation services—covering the full process from scenario-based application consulting, product design, production, quality inspection, to data initialization.

XGSun has obtained multiple certifications, including the three ISO management systems (ISO9001, ISO14001, ISO45001), FSC certification, as well as safety and environmental certifications. With a finished product pass rate of over 99.8%, the company consistently delivers on its service commitment: "Reliable Quality, Competitive Cost, Agile Delivery, and Professional Service."

A Globally Leading
RFID Tag Manufacturer & Service Provider

Making IoT simpler to foster a better life for humanity!

Why Choose Us

01 **Smart Manufacturing, Fast Delivery**

17 fully automated production lines, empowering an **annual output of 1.5 billion RFID tags**, lean manufacturing, and fast delivery!

02 **Top-Tier R&D Team, Custom Development**

A senior engineering team with **17 years of experience**, diving deep into your business scenarios to tailor digital upgrade solutions!

03 **Global Sales Service Network**

Business coverage in **100+ countries, one-on-one dedicated service**, 24/7 quick response, and full support throughout the process!

04 **Scenario-Based Solutions, Deep Industry Pain Point Insight**

Deeply cultivated in core application fields, accurately matching industry needs!

05 **Stringent Quality Control, Certified Assurance**

Certified multiple times with **ISO management systems and FSC**, ensuring reliability and sustainability of products and services!

06 **Efficient Cost Reduction, Optimized Pricing**

Strong supply chain integration capabilities, carefully balancing raw material selection and cost factors!
