

Fleet Orchestration for Digital Signage

Ensures your content actually reaches every screen. Get built-in watchdogs for monitoring, remote fleet control that CMS platforms simply can't provide.

Content That Never Fails

Radix watchdogs continuously monitor your device's health, functionality, network, app performance and much more, detecting and resolving issues before they affect playback. Your message reaches every screen, every time.

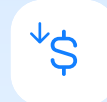

See and Fix Everything

Monitor every display metric in real time. Predict failures before they happen. Turn raw data into actionable insights across your entire fleet.

Any Android and Any CMS

Works with all leading commercial displays, signage players and other devices you may consider. Integrate with any content management system. No vendor lock-in, ever.

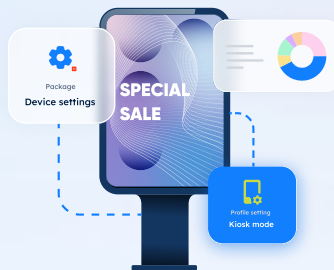

Slash Operational Costs

Remote fixes reduce truck rolls. Instant detection prevents mass outages. Automated workflows handle routine issues without human intervention.

What can you do with Radix Device Management Platform?

Device Health & Watchdogs

- ✓ Data analytics at fleet-level and issue detection
- ✓ Automated and proactive Watchdogs & remediation
- ✓ Comprehensive data collection and instant insights
- ✓ Fleet-level actionable dashboards

Remote Support

- ✓ Real-time fleet-level, AI based issues detection and remediation
- ✓ Remote assistance without on-site visits
- ✓ Group-based, single device actions or automated operations
- ✓ Remote, secured troubleshooting and configurations

Device Configuration and App Management

- ✓ Deep system-level control over devices, with unique APIs
- ✓ Create device templates, configuration scripts and workflows
- ✓ HDMI CEC control, power management and lock down
- ✓ Enhanced remote on screen messaging and alerts

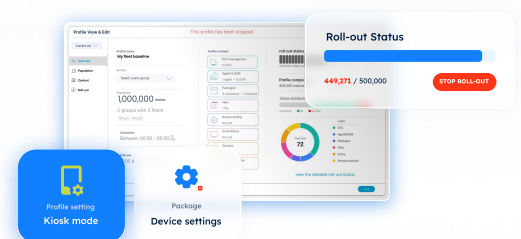

Provisioning & OTA Updates

- ✓ Zero-touch provisioning and device hardening
- ✓ Initiate, track, and report firmware updates
- ✓ Trigger-based execution: time, location, on idle
- ✓ Create configuration scripts and workflows

Content Delivery & Proof of Play

- ✓ Remote content validation on device level, without touching devices
- ✓ Proof-of-play verification across the entire fleet
- ✓ Real-time playback confirmation, hardware agnostic
- ✓ CMS-agnostic content validation layer
