

Hana Technologies, Inc. Company Profile

Dedicated to Design & Manufacturing

Hana RFID (Hana Technologies, Inc.) is redefining the Internet of Things, extending it to everyday items like clothes, tires, packages, and food, alongside its partners to boost efficiency, reduce waste, support a circular economy, and enhance life quality.

Hana RFID offers an array of RFID consumables (Inlays and Embeddable Tags) to meet its customers' unique demands. Its products serve as crucial semi-finished products for authenticating histories, streamlining tracking and inventory management, and enhancing consumer interactions in ever-growing markets.

Leading with Hana. For the long term.

- **Dedicated**, supporting industry-leading partners achieving their business goals
- **Smart, Lean and Global Manufacturing**, driving improved product availability, quality, and sustainability forward
- **Fair & sustainable price tag**, focusing on long-term market stability, customer retention, and loyalty
- **IC-independent**, ensuring supply chain resilience, economic stability, and strategic autonomy.

It is in our DNA

Hana believes that reliability and integrity are at its core, but ultimately, it is about loyalty. Hana respects its customers and values its suppliers, with the final goal of being a great place to work for everyone, a positive contributor to its community, and a relentless advocate for the environment and its natural resources. Hana commits itself to continuous improvement towards these ideals through creativity and proactive communication.

Part of the Hana Microelectronics Group

Global RFID Inlay Program

Hana RFID delivers global innovation in RFID design and manufacturing, operating over 1,000,000 square feet of advanced production space. The company is dedicated to supporting world-class label converters and ecosystem partners with a well-balanced portfolio of highest-performance RAIN (UHF) RFID inlays.

Produced in globally located, ARC Quality Certified facilities, Hana's inlays offer consistency, scalability, and compliance. With strategic manufacturing hubs, Hana ensures seamless supply chain integration—delivering unmatched reliability and trusted performance in RFID manufacturing.

Hana Technologies Company Profile

RFID EMBEDDABLE TAG

Embeddable RFID Tagging

Hana's Embeddable Tagging Program is built to enable true lifecycle traceability. Creating durable, secure digital twins. Designed for products in various markets and applications that require identification over time, it supports anti-counterfeit and theft protection, authentication, and circular economy efforts, including DPP.

Hana's global leadership in tire tagging since 2005 proves its strength in developing embeddable solutions for extreme conditions, where embedded RFID must endure heat, pressure, and strain. Ensuring performance that lasts a lifetime.
