

Shaanxi Mengxiaoban Intelligent Technology Co., Ltd. | Brand Introduction

Shaanxi Mengxiaoban Intelligent Technology Co., Ltd. carries out technical R&D relying on the Ankang Joint Laboratory for AI Plush Toys. Co-founded by leading local toy manufacturers and eco-tech enterprises affiliated with China Electronics Technology Group Corporation (CETC), we focus on the in-depth integration of AI, emotional intelligence and plush toys. We are an innovative tech enterprise integrating technology R&D, intelligent product manufacturing, computing power output and scenario-based project implementation.

Centered on core technologies of brain-like computing and affective computing agents, our company leverages robust computing power from the global commercial brain-like intelligent computing center. We equip traditional plush toys with intelligent "brains" and genuine emotional perception, reshaping companionship through technology and connecting daily life with warm intelligence.

We have built an intelligent product matrix that empowers both household and cultural tourism scenarios: As our first self-developed blockbuster product, Saisai Cat AI Smart Doll features ultra-fast 1.6-second response, multilingual interaction supporting four languages, voiceprint recognition, customizable character settings and soft emotional interaction. It serves as a top-choice intelligent companion for children's growth and family daily life.

Xiaoqi AI Travel Companion is tailored for smart cultural tourism. Embedded with a professional cultural tourism large language model developed by Shaanxi Cultural Industry Investment Group, it delivers in-depth cultural interpretation, intelligent itinerary planning and real-time location safety protection, acting as a dedicated AI guide for family trips and museum study tours.

Laki Lufe is the official Chief Natural Ecology Smart Tour Guide of Zhengzhou Green Expo Garden. Positioned as the guardian spirit of the garden, it acts as a portable "Green Expo All-Knowing Guide". It specializes in animal and plant popular science, solar term check-ins, travel guide recommendations and entertaining interactive companionship. Through lively and engaging interactions, it brings visitors an immersive natural cultural tourism experience.

Focused on the core track of AI-powered plush toys, Mengxiaoban takes cutting-edge core technologies as the foundation and diversified smart

products as the carrier. We connect two major application scenarios: family companionship and smart cultural tourism, realizing efficient integration of technology R&D and market commercialization. Our three flagship core products accurately meet demands including children's growth, family outings and cultural tourism visits. With differentiated functions and immersive interactive experiences, we have built a distinctive and highly competitive AI companionship product system, continuously providing intelligent, warm and practical companionship services for users.
