TAGEOS

Dedicated to RFID Excellence.

And to Nothing Else. Like No One Else.

TAGEOS

At Tageos, we have been RFID technology pioneers and trendsetters from the very beginning. Enthusiasm and passion for high product quality and sustainability, belief in partnership and entrepreneurial spirit are part of our DNA.

> “We enable RFID-based product digitization for businesses today, and for **generations to come.**”

Digital Transformation Requires **Product Digitization.** And Product Digitization requires **RFID.**

Digitization is a fast-growing global market driver, accelerated by RFID technology as a key enabler of digital transformation and the Internet of Things. RFID significantly facilitates supply chain visibility and efficiency by enabling hundreds of RFID tagged items to be read unambiguously from up to 20 meters (60 feet) away in fractions of a second, wirelessly and without line of sight.

Covering all needs for a wide range of markets:

In Retail, such as

- Apparel and Food
- Home Goods
- Hardware and Electronics ...

In Non-Retail, such as

- Industrial Manufacturing and Automotive
- Logistics and (Smart) Packaging
- Aviation and Baggage Tracking
- Pharma and Healthcare ...

... and many more

No RFID Inlay Supplier Like **Tageos.** No Better **Choice for You.**

Within the RFID value chain, Tageos® is the only inlay manufacturer that:

- Deliberately focuses on developing passive RAIN RFID and HF/NFC inlays and tags, leveraging distinct in-house product and antenna design expertise
- Operates a high-volume production facility in France and simultaneously builds and completes its own extensive production capabilities in the United States and China with proven, market-leading production quality

- Fully recognizes and supports the role of Converters, Service Bureaus and System Integrators within a clearly defined sales channel structure

A comprehensive product range:

- Globally compliant (ETSI and FCC) UHF/RAIN RFID and HF/NFC inlays and tags
- Large and comprehensive product portfolio for a wide range of segments
- Broad choice of product features, ICs, and form factors
- Various substrate options for standard, robust and sustainable applications
- 100% product quality control and 99.8 average production yield rate
- Best-in-class product performance and reliability
- Easy integration into customer-specific packaging designs

Nothing More Important than **Quality.** Except for **Innovation** and **Sustainability.**

Tageos' raison d'être is to rethink, innovate, build and supply RFID inlays and tags that combine market-leading quality and performance with true sustainability at very competitive prices. We were one of the first inlay manufacturers to receive and renew to this date the ARC Quality Certification from Auburn University RFID Lab for the design and manufacture of our RFID inlays. Furthermore, we continue to add a variety of important ARC Spec product approvals as well as other important industry certifications for our inlays and tags.

Tageos has been pioneering paper-based RFID inlays for years and can now offer its market-leading, comprehensive and ever-growing EOS Zero™ family of plastic-free inlays and tags, while implementing a dedicated and committed reduction plan to become net zero.

All of our EOS Zero™ products feature the following characteristics:

- 100% plastic-free
- 100% free of heavy metals
- 100% free of conflict minerals
- Up to 90% smaller carbon footprint compared to PET-based inlays
- Up to 70% less material usage due to single layer of printable, biodegradable FSC® certified paper
- Easy recycling paper substrate

- Sales & Customer Support

Why Tageos

- High-level product quality, reliability and performance
- ARC Quality Certification
- Broad range of ARC Spec product approvals
- Wide variety of key industry approvals and certifications
- Strong focus on customer value chain and services
- Great degree of product customization options
- Unique innovation strength and know-how
- Distinct in-house product design expertise
- Market's largest RFID production facility in EMEA and further growing capacities in the US and China
- True focus on highly sustainable products, operations and supply chains
- Largest market-ready, 100% plastic-free and paper-based product portfolio
- Highly competitive pricing
